name == " "
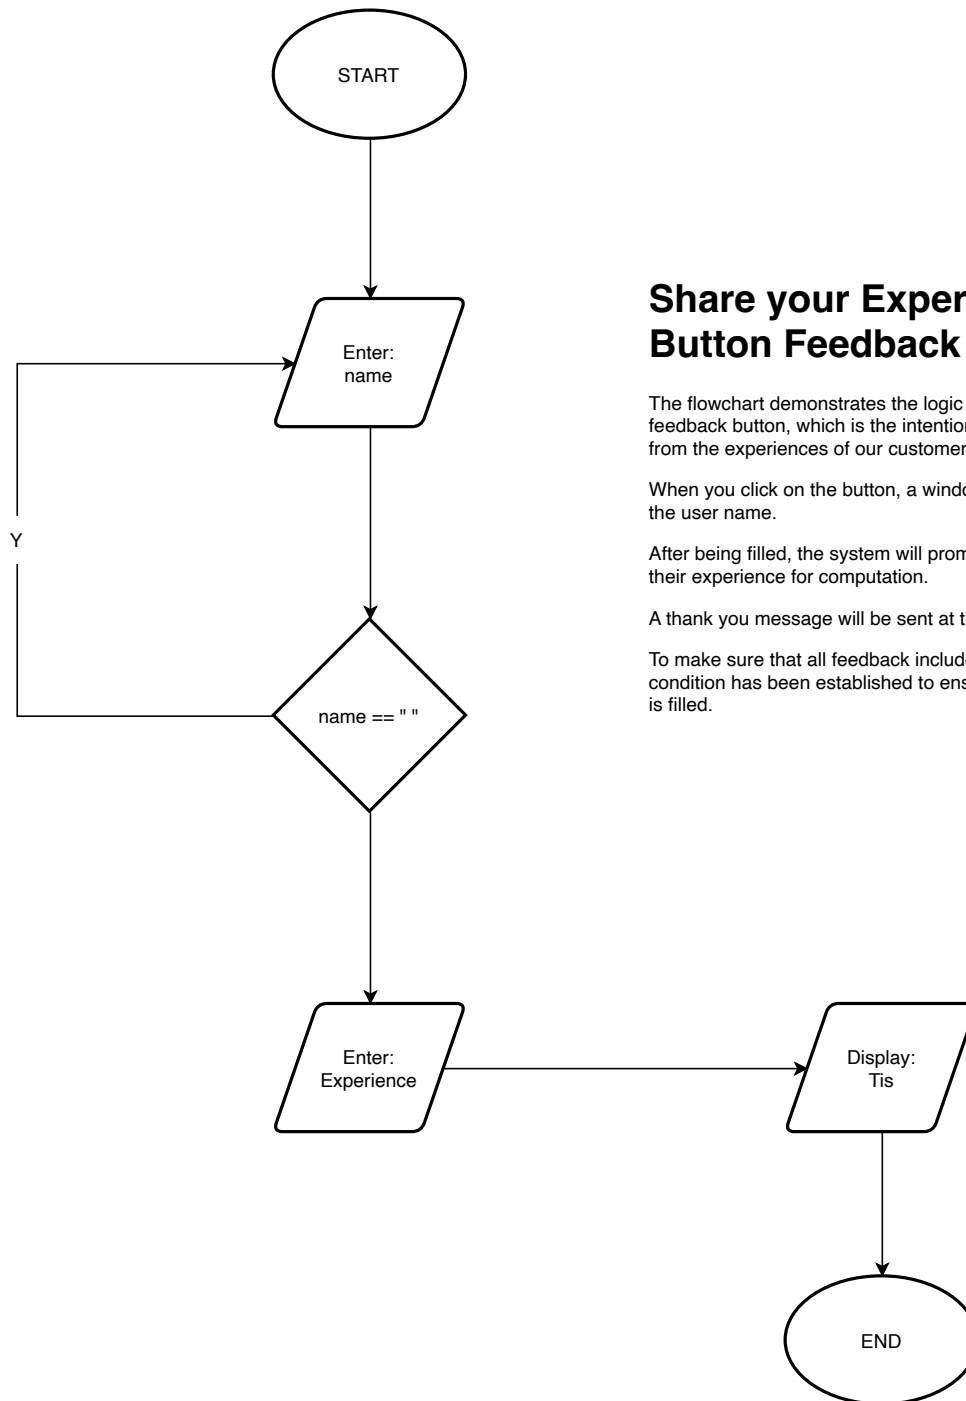

Share your Experience -
Button Feedback

The flowchart demonstrates the logic adopted in the
feedback button, which is the intention to collect feedback
from the experiences of our customers.

When you click on the button, a window will appear asking
the user name.

After being filled, the system will prompt the user to enter
their experience for computation.

A thank you message will be sent at the end of the process.

To make sure that all feedback includes the name, a
condition has been established to ensure that the name field
is filled.

Enter:
Experience

Display:
Tis
